

Signal spots
Series SL-5-R/G

Signal spots

Series SL-5-R/G

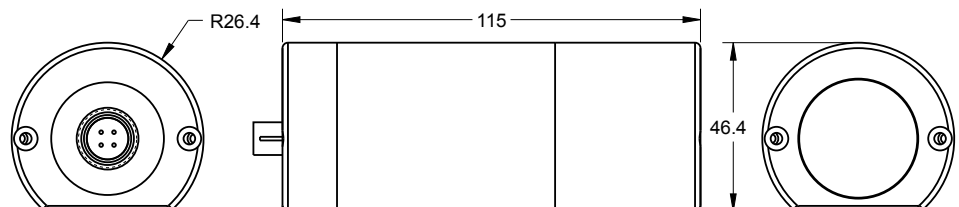

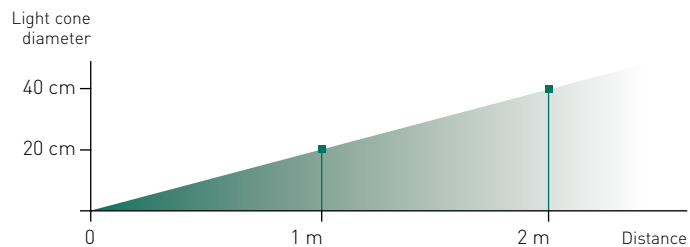

The signal spots **SL-5-R/G** points an object with a signal color red or green.

LED signal spots allow selective illumination in harsh industrial environments with compact dimensions and robust construction. A fully encapsulated electronics unit and an impact resistant polycarbonate front optic protects the lamp. The signal-spots reaches the IP 65 protection class.

The use of a system profile housing allows easy and flexible installation.

TECHNICAL DATA

- Operating voltage 12–30 V DC
- Robust aluminium housing with slot nuts M6 (nut 8)
- Connection with M12 connector plug
- Remote control and dimming with 24 V switching signal (PWM)
- Integrated overvoltage and temperature protection
- IP 65 protection class, protection class 3

Type	Part no.	Power consumption at 24 V [A]	Luminous color	GTIN/EAN
Version with M12 connector				
SL-5-R ●	10610	0.2	Red	4262388142420
SL-5-G ●	10611	0.2	Green	4262388142437
