## Innovations and quality from one source

Our products are “**Made in Germany**”, completely developed at the site in Sulzbach near Frankfurt am Main and produced in our own SMD and assembly plant.

Alongside high standards of quality, this guarantees a high level of availability and also a large number of different versions.

The in-house development of products enables us to quickly respond to technological trends and customer-specific requirements.

- Designed for heavy industrial use
- Easy electrical installation
- Assembly-friendly, robust design
- Compact, space-saving solutions
- High protection classes
- Long service life
- High energy efficiency
- Customized adjustments

## Machine lights

### 6 Series ML-x-UNI

Universal and high glare suppression

### 8 Series ML-x-45LK

For corner mounting, high glare suppression

### 10 Series ML-x-LK/ML-x-LKF

Slim and rotatable

### 12 Series ML-x-45

For corner mounting

### 14 Series ML-x-UF

Flat design

### 16 Series ML-x-20

With integrated glare control 20°

### 18 Series ML-3-F/Serie ML-3-R

Miniature lamp flat,  
Miniature lamp round

### 20 Series ML-x-Spot

Spots with slot nuts 8

### 21 Series ML-10-x

Spots with flexible metal hose

### 22 Series ML-x-UFE/ML-x-UFER

Flat design with stainless steel,  
cable outlet on the reverse side

## Machine tool lights

### 24 Series ML-x-P/WML-x-P

Rotatable, diffuser

### 26 Series WML-x-UF

Flat design

### 28 Series WML-x-UFR

Flat design, cable outlet on the  
reverse side

### 30 Series WML-x-20

With integrated glare control 20°

### 32 Series WML-x-20R

With integrated glare control 20°,  
cable outlet on the reverse side

## Workplace lights

### 34 Series AL-x-60-R

Universal tubular lights rotatable

### 36 Series AL-x-ERGO

Workplace lamps with glare-free  
light

### 38 Series AL-x-S/AL-x-D

Workplace lights in system profile  
housing

### 40 Series IL-6-BK/AL-9-BK/AL-12-BK

Workplace lights with flexible metal  
hose

## Signal lights

### 42 Series SL-x-TRIO Series SL-x-TRIO IOLINK

Universal and slim, with IO link  
interface

IO-Link

### 46 Series SL-x-TRIO Corner Series SL-x-TRIO-R Corner IOLINK

System profile housing 20 x 45°,  
with IO link interface

IO-Link

### 50 Series SL-x-TRIO-R Series SL-x-TRIO-R IOLINK

Signal light column- ø 50/60 mm,  
with IO link interface

IO-Link

- 52 **Series SL-x-TRIO-RT**  
**Series SL-x-TRIO-RT IOLINK**  
 Signal dome light – ø 50/60 mm,  
 with IO link interface

- 54 **Series SL-5-R/G**  
 Signal spots with slot nuts 8

- 55 **Series SL-x-F Ampel/Ampel R**  
 Flat design

- 56 **Series SL-x-F/SL-1-NGO**  
 Flat design

## Status lights

- 58 **Series STL-x-S-RGBW**  
 In system profile housing

- 60 **Series STL-x-60R-RGBW**  
 Tubular light rotatable

## Function handles

- 62 **Series MG-x-T2**  
**Series MG-x-Tx IOLINK**  
 Machine handles with control  
 and signaling device, with IO link  
 interface

- 66 **Series MG-x-TRIO**  
**Series MG-x-TRIO IOLINK**  
 Machine handles with signal  
 surface, with IO link interface

- 70 **Series MG-x-Tx-TRIO IOLINK**  
 Machine handles with control  
 and signaling device, with IO link  
 interface

## Control and signaling devices

- 72 **Series uHMI**  
 Extra flat design

## Accessories

### Connection cables

- 74 **GST18i3 cable range**  
 74 **RST16i3 cable range**  
 74 **RST18i3 cable range accessories**  
 75 **M12 cable range connector**  
 75 **ML-VT-2x M12**  
 Splitter

## Attachments

- 75 **ML-W1**  
 Mounting angle set  
 76 **ML-M-x**  
 Magnet holder set  
 76 **AL-6-M**  
 Magnet holder set  
 76 **ML-KL**  
 Table clamp  
 77 **WML-D**  
 Rotary attachment set  
 77 **AL-DWB**  
 Angled bracket plate set  
 77 **AL-AWB**  
 Cut-off angle plate set  
 77 **AL-Flex**  
 Mounting plate AL-Flex  
 78 **ML-x-P-FS**  
 Foot plate set  
 78 **WML-x-P-FSSA**  
 Foot plate set for protective  
 sleeve adapter  
 78 **WML-P-SSA**  
 Protective sleeve adapter  
 78 **WML-P-SS**  
 Protective sleeve

## Control accessories

- 79 **ML-PWM**  
 DIMM module, 1 TE  
 79 **AL-Bedienfeld UP/DN**  
 Operating panel

## Power supply units

- 80 **SN-x-M12**  
 Power supply mit with M12 socket

## Series ML-x-UNI

The **ML-x-UNI** machine light series was developed for a versatile and universal range of applications.

A **high level of glare suppression with a homogeneous light-emitting surface** enable these lights to be fitted regardless of the installation length. The front optic is made of **impact-resistant polycarbonate**.

The diverse range of available lengths and connection options with a 3 m PVC/PVC cable or PUR/PVC cable with a 270 mm/M12 connector plug covers a wide range of requirements for your applications. The lights in the ML-x-UNI-D series can also **be dimmed to 3 different levels** via a switch.

Long and dimmable lights with a high level of glare suppression offer huge advantages especially for the visual inspection of surfaces.

### TECHNICAL DATA

- Operating voltage 21–27 V DC
- Color temperature 5,700 K, Ra≥90
- Max. ambient temperature 50° C
- High level of glare suppression with highly effective diffuser
- High level of mechanical stability due to the polycarbonate optics and aluminium housing
- Variants with integrated dimming
- Variants with a M12 connector plug available
- IP 54 protection class, protection class 3

## Series ML-x-45LK

The machine lights series **ML-x-45LK** are built on the base of a **system profile housing in the grid of 20 mm and slot 5**. Two included movable slot nuts facilitate an easy mounting in machines and apparatus.

The front optic is made of **shock-resistant and shatterproof polycarbonate**. Due to the high degree of diffusion it has a high glare suppression and a homogenous light-emitting surface.

The machine lights of the series ML-x-45LK are available with whether a 3 m PVC/PVC cable with an open end or a M12 connector plug (\*M12 versions). The lights are available in 9 power versions and are perfectly suitable for **space-saving mounting in corners**.

### TECHNICAL DATA

- Operating voltage 21–27 V DC
- Light color daylight white
- Color temperature 5,700 K
- Color rendering index Ra≥90
- Max. ambient temperature 50° C
- Integrated overvoltage, current and temperature protection
- IP 54 protection class, protection class 3

# Machine lights

## Series ML-x-LK/ML-x-LKF

The machine lights series **ML-x-LK** and **ML-x-LKF** allows illumination with slim dimensions easy integration into machines or electrical cabinets without significantly restricting the space. A simple electrical installation directly to 24 V is implemented 3 m PVC/PVC cable or with M12 connector plug.

The 360° rotatable and robust aluminum housing of the series ML-x-LK allows for flexible orientation of lighting.

The bolttable aluminum housing with M6 allen screws of the series ML-x-LKF enables easy installation in industrial environment.

The maximum ambient operating temperature is 50° C.

### TECHNICAL DATA

- Operating voltage 21–27 V DC
- Resistant to shock or vibration
- Remote control and dimming with switching signal (PWM)
- Robust aluminium housing
- Integrated overvoltage and temperature protection
- 360° rotatable, slim round housing (Serie ML-x-LK)
- Robust, slim and bolttable aluminium housing (Serie ML-x-LKF)
- Flicker-free illumination in daylight quality, color temperature 5,700 K, Ra≥90
- Polycarbonat front lens
- IP 54 protection class, protection class 3

## Series ML-x-45

The **ML-x-45** machine light series is a superior-quality 24 V LED lighting solution for sophisticated industrial applications.

A thermally optimized LED electronic unit is cooled in a 40 mm aluminium profile housing, ensuring a long service life.

Embedding the electronics in a transparent UV-resistant PUR casting protects the machine lights against environmental influences, moisture and numerous chemicals (lyes, acids and oil).

This LED machine light series is ideally suitable for space-saving and glare-free corner mounting. The mounting angle kit ML-W1 (see accessories), with offset holes, enables the realisation of flush mounting on 40 mm profile systems.

### TECHNICAL DATA

- Operating voltage 21–27 V DC
- Connection with M12 connector plug/250 mm PUR/PVC cable or 5 m PUR/PVC cable with open end
- Remote control with 24 V signal
- Dimming with PWM signal
- Resistant to shock or vibration
- Compact, robust design
- Robust aluminium housing
- Integrated overvoltage and temperature protection
- 2x slot nuts M6 are included
- Flicker-free illumination in daylight quality, color temperature 5,700 K, Ra≥90
- IP 68 protection class, protection class 3

## Series ML-x-UF

The **ML-x-UF** machine light series is a superior-quality 24 V LED lighting solution for sophisticated industrial applications.

A thermally optimized LED electronic unit is cooled in a 40 mm aluminium profile housing, ensuring a long service life.

Embedding the electronics in a transparent UV-resistant PUR casting protects the machine lights against environmental influences, moisture and numerous chemicals (lyes, acids and oil).

This series are especially suitable due to the low height of 10 mm for applications with limited space.

### TECHNICAL DATA

- Operating voltage 21–27 V DC
- Connection with M12 connector plug/250 mm PUR/PVC cable or 5 m PUR/PVC cable with open end
- Powerless remote control with 24 V signal
- Dimming with PWM signal
- Resistant to shock or vibration
- Compact, robust and particularly flat design
- Robust aluminium housing
- Fixing with 2x hexagonal socket head screws M6/DIN 912
- Integrated overvoltage and temperature protection
- Flicker-free illumination in daylight quality, color temperature 5,700 K, Ra ≥ 90
- IP 68 protection class, protection class 3

## Series ML-x-20

The **ML-x-20** machine light series is a high-quality 24 V LED lighting solution for sophisticated industrial applications.

The integrated, inclined LED module enables **ceiling mounting with LED integrated glare control**, or dimmed peripheral illumination can be achieved with wall mountings.

A thermally optimized LED electronic unit is cooled in a 40 mm aluminium profile housing, ensuring a long service life.

Embedding the electronics in a transparent UV-resistant PUR casting protects the machine lights against environmental influences, moisture and numerous chemicals (lyes, acids and oil).

### TECHNICAL DATA

- Operating voltage 21–27 V DC
- Integrated cut-off angle 20°
- Connection with M12 connector plug / 250 mm PUR/PVC cable or 5 m PUR/PVC cable with open end
- Lateral or rear cable outlet
- Remote control with 24 V signal
- Dimming with PWM signal
- Resistant to shock or vibration
- Compact, robust and flat design
- Flat aluminium housing
- Fixing with 2x hexagonal socket head screws M6/DIN 912
- Integrated overvoltage and temperature protection
- Flicker-free illumination in daylight quality, color temperature 5,700 K, Ra ≥ 90
- IP 68 protection class, protection class 3

## Series ML-x-Spot

The spot lights **ML-x-Spot** allow with low size and robust design a spot-like illumination in harsh industrial environments. With fully encapsulated electronics unit and an impact resistant windshield the LED spots are protected from influences in industrial environments. The spot lights achieves protection class IP 65.

By using a system profile housing with the types ML-5-Spot and ML-10 Spot an easy and flexible installation with slot nuts is possible.

The spot lights have a beam angle of 20° and radiate a directional homogeneous and flicker-free light in daylight quality to an object. Because the optical focusing, the working distance can be increased, so that the lights do not restrict the working space. With the flexible metal hose (types **ML-10-x**) the light cone can be aligned accurately.

### ACCESSORIES OPTIONAL

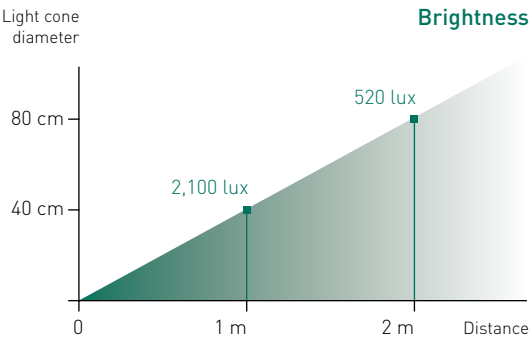

- Power supply SN-12-M12
- Connection cables

(Look at accessories page 75, 80)

### TECHNICAL DATA

- Operating voltage 16–30 V DC
- Connection with M12 connector plug
- Flexible metal hose, 250 mm, 450 mm or 650 mm (ML-x-250, ML-x-450, ML-x-650)
- Montage with slot nuts (slot nuts M6 enclosed) (ML-x-Spot)
- Remote control and dimming with 24 V switching signal (PWM)
- Robust anodized aluminium housing
- Resistant to impacting and vibration
- Impact resistant polycarbonat front lens
- Integrated overvoltage and temperature protection
- Color temperature 5,700 K
- IP 65 protection class, protection class 3

# Stainless steel machine lights

## Series ML-x-UFE

Production plants that manufacture food-stuffs, as well as laboratory facilities in the chemical and pharmaceutical industries, are required to meet special criteria when it comes to the equipment they use. High standards of hygiene reduce or prevent health risks for end consumers and employees.

The stainless steel machine lights **ML-x-UFE** are completely encapsulated in crystal clear casting to eliminate the possibility of foreign media penetrating into them. The housing for the lights is manufactured out of solid, electropolished stainless steel that guarantees a high level of resistance to chemicals and abrasion. In order to increase the chemical resistance, it is possible to select the series **ML-x-UFGE** featuring a hardened glass cover on the front. The rear installation of the lights means that the easy-to-clean front section does not contain any drilled holes and seams on which residues could accumulate.

As a result of the particularly flat design, the lights require little installation space and deliver effective lighting for environments with high hygienic standards.

### TECHNICAL DATA

- Operating voltage 21-27 V DC
- 3 m PVC cable with open end
- Powerless remote control with 24 V signal
- Dimming with PWM signal
- Resistant to shock or vibration
- Compact, robust and particularly flat design
- Electropolished stainless steel housing
- Fixing on rear with M6 thread
- Integrated overvoltage and temperature protection
- Flicker-free illumination in daylight quality, color temperature 5,700 K, Ra≥90
- IP 68 protection class (ML-x-UFE), protection class 3
- IP 68/IP 69 K protection class (ML-x-UFGE), protection class 3

# Machine lights/Machine tool lights

## Series ML-x-P/WML-x-P

The machine light series **ML-x-P/WML-x-P** allows with very compact dimensions easy and spaces saving integration in significantly restricting machines or tooling machines. With M12 connector plug systems a simple electrical installation directly to 24 V DC is possible.

With a **rotatable and robust aluminum housing**, the impact-resistant polycarbonate windscreen (ML-X-P) or thermally hardened safety glass (WML x-P), the LED light is protected against mechanical environmental influences and numerous chemicals as alkalis, acids and oils.

The highly efficient LEDs – in combination with the **fine prismatic glare suppression** – produce a wide beam angle of 100° and a flicker-free light in the usual daylight quality.

The series ML-x-P and WML-x-P are each in four power-sizes available. The series WML-x-P is designed for the machine tool industry and has a stainless steel front protection and a thermally hardened safety glass optics.

### TECHNICAL DATA

- Operating voltage 21.5–27 V DC
- Connection with M12 connector plug
- Remote control and dimming with switching signal (PWM)
- Robust, rotatable aluminium housing
- Fine prismatic front glass for glare suppression
- Impact resistant polycarbonat front lens (ML-x-P)
- Thermally hardened safety glass front lens stainless steel front protection (WML-x-P)
- Integrated overvoltage and temperature protection
- Max. ambient temperature 50° C
- Color temperature 5,700 K, Ra≥90, beam angle 100°
- IP 68/IP 69 K protection class, protection class 3

# Machine tool lights

## Series WML-x-UF

The machine tool lights series **WML-x-UF** allows illumination with compact dimensions an easy integration into machines and cutting machines without significantly restricting the space.

The robust **aluminum housing with stainless steel protection plate** and a **thermally hardened glass front** protects the lamp against a lot of chemicals such as alkalis, acids and oils and hot chippings in machine tools. The lights are completely casted with a transparent PUR encapsulation which prevents infiltration of oil or other liquids.

The LED-lamps generate a flicker-free illumination in daylight quality with an beam angle 110°.

The series WML-x-UF is available in five power sizes types. The electrical installation can plugged with M12 connector or with 5 m PUR/PVC cable with open end. These lights with the **flat construction** are particularly suitable for space-saving applications.

### TECHNICAL DATA

- Operating voltage 21–27 V DC
- Connection with M12 connector plug / 250 mm PUR/PVC cable or 5 m PUR/PVC cable with open end
- Remote control and dimming with switching signal (PWM)
- Resistant to impacting or vibration
- Thermally hardened glass front
- Robust aluminum housing with stainless steel protection plate
- Completely casted with a transparent PUR encapsulation
- Integrated overvoltage and temperature protection
- Compact, particularly flat design
- Flicker-free illumination in daylight quality, color temperature 5,700 K, Ra ≥ 90
- Max. ambient temperature 50° C
- IP 68/IP 69 K protection class [DIN 40050-9:1993], protection class 3

## Series WML-x-UFR

The compact dimensions of the machine tools series **WML-x-UFR** allow an easy integration into machines and cutting machines without significantly restricting the space. On account of the cable outlet on the reverse in combination with the flat construction of the housing a bigger cutting in the metal plate is no longer necessary.

The **robust aluminum housing with stainless steel protection plate** and a **thermally hardened glass front** protect the lamp against a lot of chemicals such as alkalis, acids, oils and hot chippings in machine tools. The lights are completely casted.

The machine tool lights of the series WML-x-UFR are available with either M12 connector or with 5 m PUR/PVC cable with open end (\*LC versions).

### TECHNICAL DATA

- Operating voltage 21–27 V DC
- Light color daylight white

## Workplace lights

### Series AL-x-60-R

The Workplace and workshop lights of the series **AL-x-60-R** are universal **tube lights** made of **shock-resistant and shatterproof polycarbonate**. Due to the high degree of diffusion the light has a high glare suppression and a homogenous light-emitting surface. Since the lights can be rotated by 360 degrees it is quite easy to be positioned.

These tube lights are available whether with a supply voltage of 24 V DC or as a line voltage supply with 230 V AC. The connection is being realized via a M12 sensor connector plug or a Wieland connector plug RST16I2. The types of AL-x-60-RD have a feed-through wiring with two RST16i3 Wieland connector plugs (plug/jack) for chaining the lights.

There are five power classes of AL-x-60-R available.

#### TECHNICAL DATA

- Operating voltage 21–27 V DC, protection class 3, or 200–240 V AC/50Hz, protection class 2
- Light color daylight white
- Color temperature 5,700 K
- Color rendering index  $R_a \geq 90$
- Complies with DIN EN 60598-2-24 for luminaires with limited surface temperatures
- 60 mm polycarbonate tube with 2 mm wall thickness
- Max. ambient temperature 40°C
- Integrated overvoltage, current and temperature protection
- IP 67 protection class

## Series AL-x-ERGO

The series **AL-X-ERGO** workstation lights are designed for integration into industrial system workstations. They are robust and designed for the environment in production facilities, workshops and factories.

High demands on light quality for assembly work and visual inspections require **glare-free work light**, a **high light color rendering index (Ra)** for natural colors, adjustable brightness and adjustable colour temperature for fatigue-free working adapted to the application.

Excellent glare control is achieved through intelligent light control, integrated diffusers. The brightness can be dimmed from 0–100% and the color temperature in the range of 2700–6500 K can be optimally adjusted to the application at any time via a front panel.

### TECHNICAL DATA

- Operating voltage 110–240 V AC / 50Hz
- Wieland GST18i3 connection systems
- 2x glare suppression
- Integrated dimming
- Adjustable light color 2,700–6,500 K
- Color rendering index Ra ~ 85
- Max. ambient temperature 40° C
- IP 40 protection class, protection class 1
- Through-wiring
- Fastening with profile slot nut 8

## Workplace lights

## Workplace and machine lights

### Series AL-x-S/AL-x-D

**AL-x** is intended for use in assembly workplaces and designed for machinery which does not use liquid coolants.

With the excellent energy efficiency of the latest LEDs and a long service life, these light systems enable you to achieve a high level of sustainability when compared to conventional lighting, thanks to low energy consumption and cost savings achieved through a maintenance-free system.

Flexible mounting options realized with adjustable slot nuts (slot 8) facilitate easy integration of the LED workplace light AL-x in system workplaces or machines. The **integrated dimmer module** enables optimum adaptation to the required lighting conditions.

#### TECHNICAL DATA

- Operating voltage 22–26 V DC
- Connection with M12 connector plug
- Max. ambient temperature 40° C
- Beam angle approx. 100°
- Remote control with 24 V signal (series AL-x-S)
- Dimming with membrane keys (series AL-x-D)
- ESD-safe full metal housing in system profile
- Fine prismatic front glass made out of shock-resistant polycarbonate for glare suppression
- Daylight quality, color temperature 5,700 K, Ra ≥ 90
- IP 40 protection class, protection class 3

## Series IL-6-BK / AL-9-BK / AL-12-BK

The workplace lights **IL-6-BK**, **AL-9-BK** and **AL-12-BK** are suitable for machine and workshop lighting, even where shiny parts in daylight color are involved. They have been designed for quality assurance and visual inspections in industrial use. Modern LED technology and a high degree of energy efficiency enable you to realise quality assurance and assembly work without any disruptive thermal radiation.

A flexible metal hose and a slim light head allow you to light even in hard to reach objects close to the region of interest. An integrated dimming-module offers a brightness adjustment to the ambient conditions.

The LED workplace lights are resistant to impacting and vibration, equipped with highly efficient LEDs and provides flicker-free working in daylight color with a high color rendering index.

All lights are available in black and will be delivered with table clamp.

### TECHNICAL DATA

- Operating voltage 21–27 V DC
- Daylight quality, color temperature 5,700 K
- Dimming via UP/DOWN membrane keypad
- Robust aluminium housing, front optics polycarbonat
- Slim light head
- Flexible metal hose
- Versatile mountable
- IP 54 protection class

# Signal lights

## Series SL-x-TRIO

The signal light series **SL-x-TRIO** is designed for front installation using two M6 hexagon socket head cap screws (DIN ISO 4762). These signal lights can thus be easily integrated into profile systems with T-nuts.

The stable aluminium housing and the **shock-resistant polycarbonate optic** can withstand tough industrial environments. The polycarbonate diffuser, which was specially developed for LED applications, ensures a **homogeneous light-emitting surface** with high efficiency.

The electrical installation is easily realized with a Operating voltage of 24 V DC via a 4-pole PVC cable of 5 m in length or with a M12 connector. The Operating voltage range is 21–27 V DC. The maximum ambient temperature is 50° C.

### TECHNICAL DATA

- Operating voltage 21–27 V DC
- Signal colors in one light: Red/Yellow/Green/Blue
- Resistant to shock or vibration
- Robust, anodized aluminium housing
- Shock-resistant polycarbonate diffuser
- IP 54 protection class, protection class 3

# Signal lights

## Series SL-x-TRIO IOLINK

The **SL-x-TRIO IOLINK** signal lights series is designed for frontal mounting with two M6 hexagon socket head cap screws (DIN ISO 4762). As a result, these signal lights can be integrated with ease in profile systems with a T-slot.

The sturdy aluminium housing and **shock-resistant polycarbonate optic** can withstand severe industrial conditions. Specially developed for LED applications, the polycarbonate diffusor ensures a **homogeneous light-emitting surface** and a high degree of efficiency.

With an IO link interface, these intelligent signal lights ensure that you know how your transducer is functioning at all times. Function tests of the signal lamps can be omitted.

In addition, you can configure the colors and signal functions and the frequency and tone intervals of the integrated piezo buzzer at any time for these signal lights via the IO link interface.

### TECHNICAL DATA

- Operating voltage 20–30 V DC
- Max. ambient temperature 50° C
- IO link interface COM2
- Connection with 3 m PVC/PVC cable or M12 connector
- Shock-resistant polycarbonate diffusor for homogeneous signal surface
- High shock resistance: No internal oscillators and inductances sensitive to shock
- Integrated LED current and buzzer current monitor with error event output
- Parameterisable via IO link:
  - 24-bit RGB color table
  - Permanent function, flashing frequency and interpulse period, dimming, signal color
  - Buzzer frequency 2,500–4,000 Hz
  - Continuous tone, interpulse period and audio signal
  - Dimming 0–100%
- IP 54 protection class, protection class 3

## Signal lights

### Series SL-x-TRIO Corner

The signal light series **SL-x-TRIO Corner** is designed for being installed in the corner of machines. Thanks to the system profile housing in the 20 mm grid and slot 5 it is very easy to generate a space-saving mounting in corners.

The **polycarbonate** front optic is **shock-resistant**. Due to the high degree of diffusion it has a high level of glare suppression and a homogenous light-emitting surface.

The signal lights of the series SL-x-Trio Corner are available either with 5 m PVC/PVC cable with open end or with a M12 connector (\*M12 types). These signal lights are available in 5 different sizes and perfectly suited for a **space-saving mounting in corners**.

#### TECHNICAL DATA

## Series SL-x-TRIO Corner IOLINK

The signal lights series **SL-x-TRIO Corner IOLINK** are built on the base of a system profile housing in the grid of 20 mm and slot 5. Easy installation in machines and apparatus is achieved by means of two movable slot nuts supplied.

The front optic is made of **shock-resistant and shatterproof polycarbonate**. Due to the high degree of diffusion it has a high glare suppression and a **homogenous light-emitting surface**.

With an IO link interface, these intelligent signal lights ensure that you know how your transducer is functioning at all times. Function tests of the signal lamps can be omitted.

In addition, you can configure the colors and signal functions and the frequency and tone intervals of the integrated piezo buzzer at any time for these signal lights via the IO link interface.

### TECHNICAL DATA

## Series SL-x-TRIO R

Distinctive characteristics of the **SL-x-TRIO R** signal light series are the low installation height with simultaneously homogeneous light in four signal colors, as well as the robust and high-quality aluminium housing available in two diameters of 52 mm and 62 mm.

The number of possible applications benefits from their individual design and their adherence with technical standards for industrial environments.

The 24 V DC operating voltage for each color is supplied via a 4-pole PVC/PVC cable of 5 m in length or a M12 connector plug. The maximum ambient temperature is 50° C.

### TECHNICAL DATA

- Operating voltage 21–27 V DC
- Robust aluminium housing
- Four signal colors in one device: Red/Yellow/Green/Blue
- Shock-resistant polycarbonate diffuser for homogeneous light-emitting surface
- Integrated overcurrent and temperature protection
- Integrated reverse polarity protection
- IP 67 protection class, protection class 3

## Series SL-x-TRIO-R IOLINK

Distinctive characteristics of the **SL-x-TRIO-R IOLINK** signal light series are the low installation height with simultaneous homogeneous display of a wide range of colors (24-bit color depth), as well as the robust and high-quality aluminium housing available in two diameters of 52 mm and 62 mm.

The number of possible applications benefits from their individual design and their adherence with technical standards for industrial environments.

With an **IO link interface**, these intelligent signal lights ensure that you know how your transducer is functioning at all times. Function tests of the signal lamps can be omitted.

In addition, you can configure these signal lights with **signal functions (flashing, flashing frequency, flash, etc.)** at any time via the IO link interface.

The 24 V DC operating voltage for each color is supplied via a 3-pole PVC/PVC cable of 3 m in length or a M12 connector plug. The maximum ambient temperature is 50° C.

### TECHNICAL DATA

- Operating voltage 20–30 V DC
- IO link interface COM2
- Connection with 3 m PVC/PVC cable or M12 connector
- Shock-resistant polycarbonate diffuser for homogeneous signal surface
- High shock resistance: No internal oscillators and inductances sensitive to shock
- Integrated LED current and buzzer current monitor with error event output
- Parameterisable via IO link:
  - 24-bit RGB color table
  - Permanent function, flashing frequency and interpulse period, dimming, signal color
  - Dimming 0–100%
- Temperature monitoring
- IP 67 protection class, protection class 3

# Signal lights

## Series SL-x-TRIO RT

Distinctive characteristics of the **SL-x-TRIO RT** signal light series are the low installation height with simultaneously homogeneous light in four signal colors, as well as the robust and high-quality aluminium housing available in two diameters of 52 mm and 62 mm.

The number of possible applications benefits from their individual design and their adherence with technical standards for industrial environments.

### TECHNICAL DATA

- Operating voltage 21–27 V DC
- Robust aluminium housing
- Shock-resistant polycarbonate diffuser
- Four signal colors in one device: Red/Yellow/Green/Blue
- Homogeneous light-emitting surface
- Integrated overcurrent and temperature protection
- Integrated reverse polarity protection
- IP 67 protection class, protection class 3

Type	Part no.	Power consumption Color Red/Yellow/Green/Blue (mA)	Dimensions Ø x H (mm)	GTIN/EAN
Version with 5 m PVC/PVC cable or M12 connector

# Signal lights

## Series SL-x-TRIO-RT IOLINK

Distinctive characteristics of the **SL-x-TRIO-RT IOLINK** signal light series are the low installation height with simultaneous homogeneous display of a wide range of colors (24-bit color depth), as well as the robust and high-quality aluminium housing available in two diameters of 52 mm and 62 mm.

The number of possible applications benefits from their individual design and their adherence with technical standards for industrial environments.

With an **IO link interface**, these intelligent signal lights ensure that you know how your transducer is functioning at all times. Function tests of the signal lamps can be omitted.

In addition, you can configure these signal lights with **signal functions (flashing, flashing frequency, flash, etc.)** at any time via the IO link interface.

### TECHNICAL DATA

- Operating voltage 20–30 V DC
- IO link interface COM2
- Connection with 3 m PVC/PVC cable or M12 connector
- Shock-resistant polycarbonate diffuser for homogeneous signal surface
- High shock resistance: No internal oscillators and inductances sensitive to shock
- Integrated LED current and buzzer current monitor with error event output
- Parameterisable via IO link:
  - 24-bit RGB color table
  - Permanent function, flashing frequency and interpulse period, dimming, signal color
  - Dimming 0–100%
- Temperature monitoring
- IP 67 protection class, protection class 3

# Signal spots

## Series SL-5-R/G

The signal spots **SL-5-R/G** points an object with a signal color red or green.

LED signal spots allow selective illumination in harsh industrial environments with compact dimensions and robust construction. A fully encapsulated electronics unit and an impact resistant polycarbonate front optic protects the lamp. The signal-spots reaches the IP 65 protection class.

The use of a system profile housing allows easy and flexible installation.

### TECHNICAL DATA

- Operating voltage 12–30 V DC
- Robust aluminium housing with slot nuts M6 (nut 8)
- Connection with M12 connector plug
- Remote control and dimming with 24 V switching signal (PWM)
- Integrated overvoltage and temperature protection
- IP 65 protection class, protection class 3

# Signal lights

## Serie SL-x-F / NGO

Due to their compact design, signal lights in the series **SL-x-F/NGO** can be positioned very near to the object so that the relevant signal is easier to locate. As a result of the completely encapsulated design, these signal lights are protected against emulsions, lubricating oils, cleaning agents, etc.

The SL-x-F / NGO series can, for example, be mounted directly inside a machine cell so that the entire machine cell lights up in the respective signal color.

### TECHNICAL DATA

- Operating voltage 21–27 V DC
- Robust aluminium housing
- New compact design
- Completely encapsulated electronics in crystal clear PUR casting
- High luminosity
- Integrated reverse polarity protection
- IP 68 protection class, protection class 3

# Signal lights

## Series SL-x-F Ampel / Ampel R

The signal lights **SL-x-F-Ampel** with their very flat design are quite simple to door or gate systems or other mounting without cut-outs. They have a high degree of protection (IP 68) due to the fully encapsulated electronics. They have a high degree of protection (IP 68) due to the completely encapsulated electronics and are waterproof, oil-tight and easy to clean.

The operating voltage is 24 V. The robust LEDs are operated with current stabilisation.

### TECHNICAL DATA

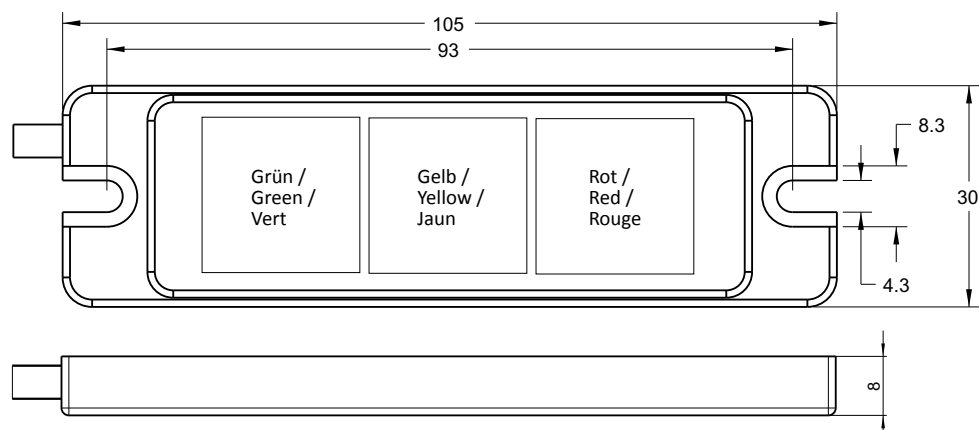

- Operating voltage 21–27 V DC
- Robust aluminium housing
- New compact design
- LEDs colors Red/Yellow/Green
- Completely encapsulated electronics in crystal clear PUR casting
- High luminosity
- Max. ambient temperature 50° C
- Integrated reverse polarity protection
- IP 68 protection class, protection class 3

# Status lights

## Series STL-x-S-RGBW

The status lights of the **STL-x-S-RGBW** series with their system profile housing and diffuser made of **impact-resistant and shatterproof polycarbonate** are ideally suited for industrial environments. The fine prismatic optics offer very good glare control.

Flexible mounting options with adjustable slot nuts (slot 8) facilitate easy integration into system workstations or machines.

The status lights are operated with a supply voltage of 24 V DC. The connection to the supply voltage is implemented via a 5-pin M12 sensor connector. With three control lines, eight status states can be coded (with OFF state).

### TECHNICAL DATA

- Operating voltage 21–27 V DC
- Operating temperature max. 40°C
- Connection with M12 connector plug (5-pin)
- Status colors and states:  
Red/Green/Blue/Yellow/Purple/White (5,700 K) and flashing Red
- Colour rendering index CRI 80–85
- Fine prismatic front glass made out of shock-resistant polycarbonate for glare suppression
- Integrated overvoltage protection
- IP 40 protection class, protection class 3

Type	Part no.	Operating voltage (V DC)	Power consumption max. [A]	Rated power max. [W]	Dimensions L x W x H (mm)	GTIN/EAN
Version with M12 connector

# Status lights

## Series STL-x-60R-RGBW

The **STL-x-60R-RGBW** series status lights are universal tube lights made of **impact-resistant and shatterproof polycarbonate**. The high degree of diffusion offers very good glare control and generates a homogeneous light area. The status lights can be rotated almost 350° which makes it easier to align with objects.

The status lights are operated with a supply voltage of 24 V DC. The connection to the supply voltage is implemented via a 4-pin M12 sensor connector. This allows eight status states to be encoded (with the OFF state).

### TECHNICAL DATA

- Operating voltage 21–27 V DC
- Connection with M12 connector plug (5-pin)
- Status colors and states: Red / Green / Blue / Yellow / Purple / White (5,700 K) and flashing Red
- Flashing signal: Red
- Diffused 60 mm polycarbonate tube with 2 mm wall thickness
- Operating temperature max. 40° C
- Integrated surge protection
- IP 67 protection class, protection class 3

Type	Part no.	Operating voltage (V DC)	Power consumption max. [A]	Rated power max. [W]	Dimensions L x W x H (mm)	GTIN/EAN

# Machine handles

## Series MG-x-T2x

The machine handles **MG-x-T2x** are made of natural-colored anodized aluminum and the handle legs are made of black plastic. The profile was specially designed to integrate additional functions in the installation of electronic assemblies.

The MG-x-T2x series is equipped with two integrated electronic buttons with short-circuit-proof output drivers and a green feedback LED. Contactors can be operated with the integrated semiconductor power drivers without a coupling relay. The buttons are debounced via software and have a minimum duty cycle of 200 ms. The connection to the power voltage (24 V DC) is made via a 5 m cable with an M12 connector or with an open end.

The machine handles are available in different lengths and switching functions (switches or buttons).

### TECHNICAL DATA

- Operating voltage 21–27 V DC
- Operating temperature max. 50°C
- Fastening via 2x cylinder screws, hexagonal socket M8 x 55/DIN ISO 4762
- Integrated overcurrent protection
- Integrated reverse polarity protection
- Two outputs 0.8 A/short-circuit proof
- Controllable LED for green illumination button "ON"
- IP 65 protection class
- Available with switch/button function

## Machine handles Series MG-x-Tx IOLINK

Machine function handles series

**MG-x-Tx IOLINK** are made of anodized natur aluminium and powder-coated aluminium handle legs. The profile was specially designed for the installation of electronic units for additional functions. The polycarbonate diffuser, specially developed for LED applications, ensures a homogeneous signal light area.

The polycarbonate diffuser, specially developed for LED applications, ensures a homogeneous luminous surface for feedback and signal surfaces.

The connection is made at the rear to any IO link master via a 5 m PVC/PVC cable with open end or with plug connector M8. With these intelligent signal lamps with IO link interface, you know at all times how the signal transmitter is functioning. Function tests of the signal lamps can be omitted.

In addition, you can configure these machine handles in a variety of colours and signal functions, as well as the frequency and tone intervals of the integrated piezo buzzer via the IO link interface.

### TECHNICAL DATA

- Operating voltage 21–27 V DC
- Operating temperature max. 50°C
- IO link interface COM 2
- Connection with 5 m PVC/PVC cable or M8 connector
- Unit variants with signalling surface and/or keyboard with feedback LEDs
- High shock resistance: No internal oscillators and inductances sensitive to shock
- Integrated LED current (for units with signal surface) and buzzer current monitoring with fault event transmission.
- Flashing function in the IO link device relieves the load on the controller
- Integrated temperature monitoring
- Protection class IP 65 (front), protection class 3
- Configurable and controllable via IO-Link:
  - **Signal colors:** 24-bit RGB, duration, flashing frequency, pulse-pause time, dimming
  - **Keyboard:** Switch/Button/Inactive
  - **Feedback LEDs:** Continuous/Flashing slow/Flashing fast/OFF
  - Buzzer pitch 2,500–4,000 Hz, continuous tone, tone interval with pulse-pause time

# Control and signaling devices

## Series uHMI

**uHMI's** are compact operating and signaling devices for controlling machines and systems in industrial environments. Power contactors can be operated with the integrated semiconductor power drivers without coupling relays. The buttons are debounced via software and have a minimum on-time of 200 ms.

With a robust powder-coated aluminium housing and completely encapsulated electronics, the operating units are protected against environmental influences such as liquids and numerous chemicals such as alkalis, acids and oils. Of course, the polyester front foil used also has a very high chemical resistance (DIN 42 115).

The connection to the Operating voltage is made via a 5-pole PVC/PVC cable with 3 m length and open end.

Further front foil symbols can be offered on request.

### TECHNICAL DATA

- Operating voltage 21–27 V DC
- Operating temperature max. 50°C
- Controllable LED for green illumination button "ON"
- Compact, robust and particularly flat design
- Resistant to shock or vibration
- Fastening via 2x cylinder screws, hexagonal socket M8 x 55/DIN ISO 4762
- Integrated overcurrent protection
- Integrated reverse polarity protection
- Two outputs 0.8 A/short-circuit proof
- IP 65, IP 69 K protection class
- DIN EN 60947-5-1
- Available with switch/button function

Flat design

Completely casted

## Splitter ML-VT-2x M12

The Splitter (2x M12 Female / 1x M12 Male) allows you to connect two lamps one a load.

Type	Part no.	Weight (g)	GTIN/EAN
ML-VT-2x M12	10667	30	4262388146510

## ATTACHMENTS

### Mounting angle kit

The mounting angle kit **ML-W1** enables simple flush mounting on 40 mm T-slot profile systems. ML-W1 is designed for light types ML-6-45, ML-12-45, ML-18-45, ML-24-45 and ML-36-45.

ML-W1 consists of: 1x mounting angle, powder-coated RAL 9006 white aluminium, with offset holes, 1x M6 x 14 countersunk screw, black, DIN 7991.

Type	Part no.	Weight (g)	GTIN/EAN
ML-W1	10209	50	4262388143137

## Accessories

### Magnet holder set ML-M-x

The magnet holder **ML-M-x** enables simple fixing of the machine light series ML-x, ML-x-45, ML-x-UF and ML-x-20 on ferromagnetic surfaces.

**Notice:** Two magnet holders are required per light. The magnets have a vertical retention force of approx. 5.5 kg.

**ML-M-UF** (for light series ML-x-UF), 1x magnet holder, black anodized with magnet, 1x M6 x 8 hexagonal socket screw DIN 912.

**ML-M-20** (for light series ML-x-20), 1x magnet holder, black anodized with magnet, 1x M6 x 14 hexagonal socket screw DIN 912.

**ML-M-45** (for light series ML-x-45): 1x magnet holder, black anodized with magnet, 1x M6 x 14 countersunk screw, black DIN 7991.

Type	Part no.	Weight (g)	GTIN/EAN
ML-M-UF	10239	40	4262388149641
ML-M-20	10285	40	4262388149559
ML-M-45	10218	40	4262388149689

### Magnet holder set AL-6-M

**AL-6-M** (for workplace lights IL-6-BK, AL-9-BK, AL-12-BK, workplace and machine lights AL-x-S, AL-x-D, LED spot light series ML-5-x, ML-10-x), 1x magnet holder, black anodized with 3 magnets (retention force 25 kg), 2x M6 x 22 DIN black DIN 912.

Type	Part no.	Weight (g)	GTIN/EAN
AL-6-M	10231	270	4262388149627

### Table clamp AL-6-M

**ML-KL** (for LED spot light series ML-5-x, ML-10-x), 1x table clamp, black anodized, 2x M6 x 14 countersunk screw, black DIN 7991.

Type	Part no.	Weight (g)	GTIN/EAN
ML-KL	10493	120	4262388149474

### Rotary attachment set WML-D

The rotary attachment can be mounted to the light series ML-x-UF and WML-x-UF. The scope of delivery includes a lamp adapter, 1x mounting bracket, 2x M6 x 8 hexagon socket screws and 1x M6 washer. **Note:** Two rotary attachment sets are required for each lamps. Not suitable for ML-36-UF/WML-36-UF.

Type	Part no.	Weight (g)	GTIN/EAN
WML-D	10298	60	4262388149535

### Angled bracket plate AL-DWB

The angled bracket plate set for the AL-x series consists of an angled bracket plate, 4x M6 x 12 flat socket head screws, 4x M6 washers, M6 slot nut with bridge.

Type	Part no.	GTIN/EAN
AL-DWB	10985	4262388141546

### Cut-off angle plate AL-AWB

The cut-off angle plate set for the AL-x series consists of a 20° cut-off angel plate, 2x M6 x 12 socket head screws, 2x M6 washers, M6 slot nut with bridge.

Type	Part no.	GTIN/EAN
AL-AWB	10986	4262388141553

### Mounting plate AL-Flex

Mounting plate set for the AL-x-S/D and AL-x-ERGO light series consisting of: 2x AL-Flex mounting plate, 4x countersunk screws M6 x 14, 2x allen screws M6 x 15, 2x washer M6, 2x slot nut8 M6.

Type	Part no.	GTIN/EAN
AL-Flex	11724	4262388143151

## Accessories

### Foot plate set ML-x-P-FS

Foot plate set (for light series ML-x-P) consists of: 1x ML-x-P foot plate, 2x M6 x 14 countersunk screw. **Note:** Two foot plate sets are required for a light in each case if no protective sleeve adapter is used.

Type	Part no.	Weight (g)	GTIN/EAN
ML-x-P-FS	10762	50	4262388146497

### Foot plate set WML-x-P-FSSA

Foot plate set for the WML-P-SSA protective sleeve adapter, 1x foot plate, 2x M6 x 14 countersunk screws, white aluminium powder coating (RAL 9006).

Type	Part no.	GTIN/EAN
WML-x-P-FSSA	11031	4262388146459

### Protective sleeve adapter WML-x-P-SSA

The protective sleeve adapter set for the WML-x-P series, protective sleeve adapter, 1x M3 x 25 hexagonal screw, 1x metal M20 x 1,5 protective sleeve screw.

Type	Part no.	GTIN/EAN
WML-x-P-SSA	11030	4262388146367

### Protective sleeve WML-x-P-SS

With a diameter of 21 mm, the metal protective sleeve protects the light cable against chip material, coolants and lubricants. IP 40 protection class, supplied and packaged according to the customer's wishes.

Type	Part no.	GTIN/EAN
WML-x-P-SS	11032	4262388146343

## CONTROL ACCESSORIES

### DIMM Module ML-PWM

The DIMM module **ML-PWM** is designed for dimming our LED machine lights with a high impedance input. The DIMM module is fitted into a thin top-hat rail housing and can thus be fitted in a space-saving manner into control cabinets with top-hat rail systems.

Type	Part no.	Weight (g)	GTIN/EAN
ML-PWM	10647	60	4262388149450

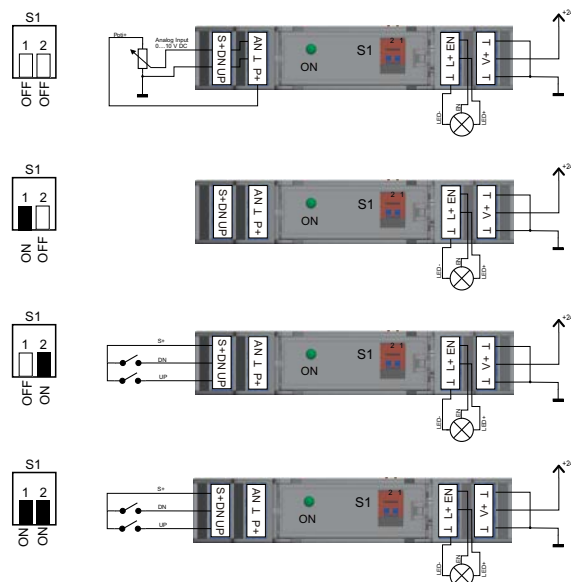

#### Functions:

**Analogue:** The lights can be dimmed from approx. 8% – 100% in an infinitely variable manner using a potentiometer > 10 kOhm or an external analogue signal of 1.5 – 9 V DC to "ON". The LED is permanently lit.

**Ramp time:** When the DIMM module is switched on, the LED lights will be smoothly switched to a dimming level of 0% – 100% in a ramp time of 0.5 seconds. The LED is permanently lit.

**Digital:** The lights are switched on at a default dimming level of approx. 85%. The dimming level can be set in 8 stages from approx. 10% – 100% by sending external sequential switching impulses to "UP" and "DN". Simultaneous impulses sent to UP/DN will switch the lights on or off. The LED is lit if the PWM is switched on. If the lights are switched off, the LED also goes out.

**Levels:** Depending on the input signal sent to "UP" and "DN", the connected lights can be dimmed in four levels: 0% / 25% / 75% / 100%. The LED is lit if the PWM is switched on. If the lights are switched off (0%), the LED goes out.

### AL-Bedienfeld UP/DN

The **AL-Bedienfeld UP/DN** is available as an optional accessory for our DIMM module ML-PWM. This enables manual dimming of one or more luminaires at a central point.

With a robust aluminium housing and weatherproof, UV-resistant and crystal-clear PUR encapsulation, the AL-Bedienfeld is protected against environmental influences and numerous chemicals such as alkalis, acids and oils. The front foil used is resistant to solvents and chemicals.

Type	Part no.	Weight (g)	GTIN/EAN
AL-Bedienfeld UP/DN	10947	120	4262388141539
